

WHAT IS DIAMOND GLOW?

Diamond Glow is a microdermabrasion treatment that aims to reveal radiant, healthy skin cells and treat them with one of SkinMedica®'s pro-infusion serums. It is a painless, non-invasive technique that can achieve significant improvement in skin texture, tone, and wrinkles. The procedure is customized to match each person's unique goals and skin type and is safe for all colors of skin.

The Diamond Glow Process

Diamond Glow treatments occur in three steps, with both the customizable diamond tips and SkinMedica® serums tailored to optimize the treatment and address your unique needs.

1. Exfoliate
2. Extract
3. Infuse

Learn how a custom Diamond Glow treatment plan can help you get the beautiful skin you want in simple, quick sessions with no downtime by scheduling a consultation with Dr. Prysi today!

MAINTAINING HAND AND OFFICE HYGIENE

In this time of uncertainties, we are still practicing safe precautions in order to limit unnecessary exposure to COVID-19. We maintain office hygiene by regularly sanitizing all surfaces, and work on keeping patients safe by using gloves and regularly washing or sanitizing hands. We are still proudly open for consultations and appointments
